

Statutory Document No. 2015/0124

Customs and Excise Act 1993

EXPORT CONTROL (AMENDMENT) ORDER 2015 (APPLICATION) ORDER 2015

Approved by Tynwald: 21st April 2015

Coming into Operation in accordance with article 2

The Treasury makes the following Order under sections 1 and 3 of the Customs and Excise Act 1993.

1 Title

This Order is the Export Control (Amendment) Order 2015 (Application) Order 2015.

2 Commencement

- (1) This Order comes into operation on the day it is approved by Tynwald¹.
- (2) However, when it is approved it shall be deemed to have come into operation on 24 March 2015².

3 Application of the Export Control (Amendment) Order 2015

- (1) The Export Control (Amendment) Order 2015³ applies to the Island, as part of the law of the Island, subject to the omission in article 1 (citation and commencement) of the words “and comes into force on 24th March 2015”.
- (2) The text of the applied legislation is annexed to this Order.

¹ Section 3(1) of the Customs and Excise Act 1993 provides that an Order under section 1 of that Act shall be laid before Tynwald as soon as is practicable after it is made (and in any case not later than the second sitting of Tynwald following the making of the Order) and if at the sitting at which it is laid Tynwald fails to approve the Order it shall cease to have effect.

² Section 3(3) of the Customs and Excise Act 1993 allows that an Order made under section 3 of that Act may be made retrospective and be deemed to have come into operation from such day or days as may be specified in the Order, not being earlier than the date on which the corresponding provision had effect in the United Kingdom. In this case the corresponding provision came into force on 24 March 2015.

³ SI 2015 No. 351.

MADE 11TH MARCH 2015

W E Teare
Minister for the Treasury

EXPLANATORY NOTE

(This note is not part of the Order)

This Order applies in Island law the Export Control (Amendment) Order 2015, which has the effect of replacing Schedule 2 to the Export Control Order 2008⁴.

Schedule 2 to the Export Control Order 2008 lists military goods, software and technology which are subject to export controls (the “UK list”). The content of the UK list derives partly from an international export control regime known as the Wassenaar Arrangement adopted in the EU through its Common Military List⁵ (CML), as well as from domestic UK controls. The substituted text of the Schedule reflects the changes.

⁴ SI 2008 No 3231, applied in the Island by SD 104/09. Relevant amendments were made by means of the following orders – SD 762/10, SD 50/12, SD 103/13 and SD 2014/0127.

⁵ The current version was adopted by the Council of the European Union on 17 March 2014 and published in the Official Journal of the European Union (OJ C.107, 9.4.14, p.1).

ANNEX

STATUTORY INSTRUMENTS

2015 No. 351

CUSTOMS

The Export Control (Amendment) Order 2015

<i>Made - - - -</i>	<i>23rd February 2015</i>
<i>Laid before Parliament</i>	<i>25th February 2015</i>
<i>Coming into force - -</i>	<i>24th March 2015</i>

The Secretary of State, in exercise of the powers conferred by sections 1, 2, 4, 5 and 7 of the Export Control Act 2002⁶, makes the following Order:

Citation and commencement

1. This Order may be cited as the Export Control (Amendment) Order 2015.

Amendments to the Export Control Order 2008

2. (1) The Export Control Order 2008⁷ is amended as follows.

(2) For Schedule 2 to the Export Control Order 2008 (Military goods, software and technology), substitute the replacement Schedule 2 set out in the Schedule to this Order.

23rd February 2015

Matthew Hancock
Minister of State for Business and Enterprise and Energy
Department for Business, Innovation and Skills

⁶ 2002 c.28.

⁷ S.I. 2008/3231, relevant amending instruments are S.I. 2010/2007, S.I. 2012/1910, S.I. 2013/428 and S.I. 2014/1069.

SCHEDULE

Article 2

Replacement Schedule 2 to the Export Control Order 2008

“SCHEDULE 2

Article 2

MILITARY GOODS, SOFTWARE AND TECHNOLOGY

Note: In this Schedule, defined terms are printed in quotation marks.

Definitions

In this Schedule:

“adapted for use in war” means any modification or selection (e.g. altering purity, shelf life, virulence, dissemination characteristics, or resistance to ultra violet (UV) radiation) designed to increase the effectiveness in producing casualties in humans or animals, degrading equipment or damaging crops or the environment;

“biocatalyst” means enzymes for specific chemical or biochemical reactions and other biological compounds which bind to and accelerate the degradation of chemical warfare (CW) agents;

“biopolymer” means the following biological macromolecules:

- a. enzymes for specific chemical or biochemical reactions;
- b. ‘monoclonal antibodies’, ‘polyclonal antibodies’ or ‘anti-idiotypic antibodies’;
- c. specially designed or specially processed ‘receptors’;

Technical Note:

‘Monoclonal antibodies’ means proteins which bind to a specific antigenic site and are produced by a single clone of cells;

‘Polyclonal antibodies’ means a mixture of proteins which bind to a specific antigen and are produced by more than one clone of cells;

‘Anti-idiotypic antibodies’ means antibodies which bind to the specific antigen binding sites of other antibodies;

‘Receptors’ means biological macromolecular structures capable of binding ligands, the binding of which affects physiological functions.

“development” means all stages prior to “production” (e.g. design, design research, design analyses, design concepts, assembly and testing of prototypes, pilot production schemes, design data, process of transforming design data into goods or “software”, configuration design, integration design, layouts);

“end-effectors” means grippers, active tooling units (i.e. devices for applying motive power, process energy or sensing to the workpiece) and any other tooling that is attached to the baseplate on the end of a “robot” manipulator arm;

“energetic materials” means substances or mixtures that react chemically to release energy required for their intended application; “explosives”, “pyrotechnics” and “propellants” are sub-classes of energetic materials;

“explosives” means solid, liquid or gaseous substances or mixtures of substances which, in their application as primary, booster, or main charges in warheads, demolition and other applications, are required to detonate;

“expression vectors” means carriers (e.g. plasmid or virus) used to introduce genetic material into host cells;

“first generation image intensifier tubes” means electrostatically focused tubes, employing input and output fibre optic or glass face plates, multi-alkali photocathodes (S-20 or S-25), but not microchannel plate amplifiers;

“fuel cell” means an electrochemical device that converts chemical energy directly into Direct Current (DC) electricity by consuming fuel from an external source;

“improvised explosive devices” means devices fabricated or intended to be placed in an improvised manner incorporating destructive, lethal, noxious, “pyrotechnic” or incendiary chemicals designed to destroy, disfigure or harass; they may incorporate military stores, but are normally devised from non-military components;

“laser” means an assembly of components which produce both spatially and temporally coherent light which is amplified by stimulated emission of radiation;

“lighter-than-air vehicles” means balloons and airships that rely on hot air or on lighter-than-air gases such as helium or hydrogen for their lift;

“nuclear reactor” means the goods within or attached directly to the reactor vessel, the equipment which controls the level of power in the core, and the components which normally contain, come into direct contact with or control the primary coolant of the reactor core;

“production” means all production stages (e.g. product engineering, manufacture, integration, assembly (mounting), inspection, testing, quality assurance);

“propellants” means substances or mixtures that react chemically to produce large volumes of hot gases at controlled rates to perform mechanical work;

“pyrotechnic(s)” means mixtures of solid or liquid fuels and oxidisers which, when ignited, undergo an energetic chemical reaction at a controlled rate intended to produce specific time delays, or quantities of heat, noise, smoke, visible light or infrared radiation; pyrophorics are a subclass of “pyrotechnics”, which contain no oxidisers but ignite spontaneously on contact with air;

“required” as applied to “technology”, refers to only that portion of “technology” which is peculiarly responsible for achieving or exceeding the controlled performance levels, characteristics or functions. Such “required” “technology” may be shared by different goods and the intended use of “technology” is irrelevant to whether it is “required”;

“riot control agents” means substances which under the expected conditions of use for riot control purposes, produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure;

Technical Note:

Tear gases are a subset of “riot control agents”.

“robot” means a manipulation mechanism, which may be of the continuous path or of the point-to-point variety, may use sensors, and which:

- a. is multifunctional;
- b. is capable of positioning or orienting material, parts, tools or special devices through variable movements in three dimensional space;
- c. incorporates three or more closed or open loop servo-devices which may include stepping motors; and d. has “user-accessible programmability” by means of the teach/playback method or by means of an electronic computer which may be a programmable logic controller, i.e. without mechanical intervention;

Note: This definition does not include:

- a. *manipulation mechanisms which are only manually/teleoperator controllable;*
- b. *fixed sequence manipulation mechanisms, which are automated moving devices, operating according to “programmes” where the motions are limited by fixed stops, such as pins or cams and the sequence of motions and the selection of paths or angles are not variable or changeable by mechanical, electronic or electrical means;*
- c. *mechanically controlled variable sequence manipulation mechanisms, which are automated moving devices, operating according to “programmes” where the motions are limited by fixed, but adjustable stops, such as pins or cams and the sequence of motions and the selection of paths or angles are variable within the*

fixed programme pattern; variations or modifications of the programme pattern (such as changes of pins or exchanges of cams) in one or more motion axes are accomplished only through mechanical operations;

- d. non-servo-controlled variable sequence manipulation mechanisms, which are automated moving devices, operating according to mechanically fixed programmed motions; the “programme” is variable but the sequence proceeds only by the binary signal from mechanically fixed electrical binary devices or adjustable stops;*
- e. stacker cranes defined as Cartesian coordinate manipulator systems manufactured as an integral part of a vertical array of storage bins and designed to access the contents of those bins for storage or retrieval.*

“special gun-mounting” means any fixture designed to mount a gun;

“superconductive” in relation to materials (e.g. metals, alloys or compounds) means those which can lose all electrical resistance (i.e. which can attain infinite electrical conductivity and carry very large electrical currents without Joule heating); the superconductive state of a material is individually characterised by a ‘critical temperature’, a critical magnetic field, which is a function of temperature, and a critical current density which is a function of both magnetic field and temperature;

Technical Note:

‘Critical temperature’ (also known as the transition temperature) of a specific “superconductive” material means the temperature at which the specific material loses all resistance to the flow of direct electrical current.

“technology” means specific ‘information’ necessary for the “development”;

“production” or “use” of goods or “software”;

Technical Note:

‘Information’ may take forms including, not limited to: blueprints, plans, diagrams, models, formulae, tables, ‘source code’, engineering designs and specifications, manuals and instructions written or recorded on other media or devices (e.g. disk, tape, read-only memories);

‘source code’ (or source language) is a convenient expression of one or more processes which may be turned by a programming system into equipment executable form.

“Unmanned Aerial Vehicle” (“UAV”) means any “aircraft” capable of initiating flight and sustaining controlled flight and navigation without any human presence on board;

“use” means operation, installation (e.g. on-site installation), maintenance, checking, repair, overhaul and refurbishing;

“user-accessible programmability” means the facility allowing a user to insert, modify or replace “programmes” by means other than:

- a. a physical change in writing or interconnections; or
- b. The setting of function controls including entry of parameters.

Military, Security and Para-military Goods, Software and Technology and Arms, Ammunition and Related Material

ML1

Smooth-bore weapons with a calibre of less than 20 mm, other firearms and automatic weapons with a calibre of 12.7 mm (calibre 0.50 inches) or less and accessories, as follows, and specially designed components therefor:

Note: ML1 does not control:

- a. *Firearms specially designed for dummy ammunition and which are incapable of discharging a projectile;*
- b. *Firearms specially designed to launch tethered projectiles, having no high explosive charge or communications link, to a range of 500 m or less;*
- c. *Firearms certified by a registered UK Proof House as having been rendered incapable of firing any ammunition in this Schedule.*

- a. Rifles and combination guns, handguns, machine, sub-machine and volley guns;

Note: ML1.a does not control:

- a. *Bayonets;*
- b. *Rifles and combination guns, manufactured earlier than 1938;*
- c. *Reproductions of rifles and combination guns, the originals of which were manufactured earlier than 1890;*
- d. *Handguns, volley guns and machine guns, manufactured earlier than 1890, and their reproductions;*
- e. *Rifles or handguns, specially designed to discharge an inert projectile by compressed air or CO₂.*

- b. Smooth-bore weapons as follows:

- 1. Smooth-bore weapons specially designed for military use;
- 2. Smooth-bore weapons not controlled by ML1.b.1., as follows:
 - (a) Fully automatic type weapons;
 - (b) Semi-automatic or pump-action type weapons;

Note: ML1.b does not control:

	<p>a. <i>Smooth-bore weapons manufactured earlier than 1938;</i></p> <p>b. <i>Reproductions of smooth-bore weapons, the originals of which were manufactured earlier than 1890;</i></p> <p>c. <i>Smooth-bore weapons, specially designed for any of the following;</i></p> <ol style="list-style-type: none"> 1. <i>Slaughtering of domestic animals;</i> 2. <i>Tranquilising of animals;</i> 3. <i>Seismic testing;</i> 4. <i>Firing of industrial projectiles;</i> <p>d. <i>Signal pistols;</i></p> <p>e. <i>Industrial Tools;</i></p> <p>f. <i>Smooth-bore weapons that are both not specially designed for military use and specially designed to discharge an inert projectile by compressed air or CO₂.</i></p>
	<p>c. <i>Weapons using caseless ammunition;</i></p>
	<p>d. <i>Sound suppressors or moderators, “special gun-mountings”, optical weapon sights and flash suppressors, for firearms specified in ML1.a., ML1.b. or ML1.c.</i></p> <p><i>Note: ML1.d. does not control:</i></p> <p>a. <i>Optical weapon sights without electronic image processing (i.e., using only lenses to view the target), with a magnification of 9 times or less, provided they are not specially designed or modified for military use.</i></p>
ML2	<p>Smooth-bore weapons with a calibre of 20 mm or more, other armament or weapons with a calibre greater than 12.7 mm (calibre 0.50 inches), projectors and accessories, as follows, and specially designed components therefor:</p> <p>a. <i>Guns, howitzers, cannon, mortars, anti-tank weapons, projectile launchers, military flame throwers, rifles, recoilless rifles, smooth-bore weapons and signature reduction devices therefor;</i></p> <p><i>Note: ML2.a. does not control:</i></p> <p>a. <i>Rifles, smooth-bore weapons and combination guns, manufactured earlier than 1938;</i></p>

	<p>b. Reproductions of rifles, smooth-bore weapons and combination guns, the originals of which were manufactured earlier than 1890;</p> <p>c. Guns, howitzers, cannons, mortars, manufactured earlier than 1890;</p> <p>d. Smooth-bore weapons specially designed for any of the following:</p> <ol style="list-style-type: none"> 1. Slaughtering of domestic animals; 2. Tranquilising of animals; 3. Seismic testing; 4. Firing of industrial projectiles; <p>e. Signal pistols;</p> <p>f. Hand-held projectile launchers, specially designed to launch tethered projectiles, having no high explosive charge or communications link, to a range of 500 m or less.</p>
	<p>b. Smoke, gas and “pyrotechnic” projectors or generators specially designed or modified for military use;</p>
	<p>c. Weapon sights and weapon sight mounts meeting both of the following descriptions:</p> <ol style="list-style-type: none"> 1. specially designed for military use, and 2. specially designed for weapons specified in ML2.a.
	<p>d. Mountings specially designed for the weapons specified in ML2.a.</p>
ML3	<p>Ammunition and fuze setting devices, as follows, and specially designed components therefor:</p> <p>a. Ammunition for weapons specified in ML1, ML2 or ML12;</p> <p><i>Note: ML3.a. does not control:</i></p> <ol style="list-style-type: none"> a. Ammunition crimped without a projectile (blank star); b. Dummy ammunition with a pierced powder chamber; c. Other blank and dummy ammunition, not incorporating components designed for live ammunition;

	<p>d. Components specially designed for blank or dummy ammunition, specified in this Note a, b or c; or</p> <p>e. Cartridges specially designed for signalling, bird scaring or lighting of gas flares at oil wells.</p>
	<p>b. Fuze setting devices specially designed for ammunition specified in ML3.a.</p>
ML4	<p>Bombs, torpedoes, rockets, missiles, other explosive devices and charges, and related equipment and accessories, as follows, and specially designed components therefor:</p> <p><i>N.B. 1: Electronic guidance and navigation equipment is controlled in ML11.a.</i></p> <p><i>N.B. 2: Aircraft missile protection systems are controlled in ML4.c.</i></p> <p>a. Bombs, torpedoes, grenades, smoke canisters, rockets, mines, missiles, depth charges, demolition-charges, demolition-devices, demolition-kits, devices that contain “pyrotechnics”, cartridges and simulators (i.e. equipment simulating the characteristics of any of these goods), specially designed for military use;</p> <p>b. Equipment that is both specially designed for military use and specially designed for ‘activities’ relating to any of the following:</p> <ol style="list-style-type: none"> 1. goods specified in ML4.a.; or 2. “improvised explosive devices”; <p><i>Technical note:</i></p> <p><i>For the purpose of ML4.b. ‘activities’ applies to handling, controlling, activating, powering with one-time operational output, launching, laying, sweeping, discharging, decoying, jamming, detonating, disrupting, detecting or disposing.</i></p> <p><i>Note: ML4.b. does not control hand held devices limited by design solely to the detection of metal objects and incapable of distinguishing between mines and other metal objects.</i></p> <p>c. Aircraft missile protection systems (AMPS).</p>

ML5	Fire control equipment and related alerting and warning equipment, related systems, test and alignment and countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:
	a. Weapon sights, bombing computers, gun laying equipment and weapon control systems;
	b. Target acquisition, designation, range-finding, surveillance or tracking systems; detection, data fusion, recognition or identification equipment; and sensor integration equipment;
	c. Countermeasure equipment for goods specified in ML5.a. or ML5.b.;
	<i>Note: For the purposes of ML.5.c.countermeasure equipment includes detection equipment.</i>
	d. Field test or alignment equipment, specially designed for goods specified in ML5.a., ML5.b. or ML 5.c.
ML6	Ground “vehicles” and components as follows: <i>N.B. Electronic guidance and navigation equipment is controlled in ML.11.a.</i>
	a. Ground “vehicles” and components therefor, specially designed or modified for military use; <i>Technical Note:</i> <i>For the purposes of ML6.a. the term ground “vehicles” includes trailers.</i> <i>Note: In ML6.a. modification of a ground “vehicle” for military use entails a structural, electrical or mechanical change involving one or more specially designed military components.</i>
	b. Other ground “vehicles” and components, as follows: 1. “Vehicles” having all of the following: a. manufactured or fitted with materials or components to provide ballistic protection to level III (NIJ 0108.01, September 1985, or comparable national standard) or better; b. a transmission to provide drive to both front and rear wheels simultaneously, including those vehicles having additional wheels for load bearing purposes whether driven or not;

- c. “Gross Vehicle Weight Rating (GVWR)” greater than 4,500 kg; and
 - d. designed or modified for off-road use;
2. Components meeting both of the following descriptions—
- a. specially designed for “vehicles” specified in ML6.b.1.; and
 - b. providing ballistic protection to level III (NIJ 0108.01, September 1985 or comparable national standard), or better.

Technical Notes:

- 1. *NIJ 0108.01 means the National Institute of Justice standard for Ballistic Resistance for Protective Materials.*
- 2. *“Gross Vehicle Weight Rating (GVWR)” is also known as Maximum Authorised Mass, Gross Vehicle Weight or Permissible Maximum Weight.*

N.B. See also ML13.a. for armoured plate.

Note 1: ML6.b. does not control “vehicles” designed or modified for transporting money or valuables .

Note 2: ML6.b. does not control “vehicles” fitted with, or designed or modified to be fitted with, a plough, flail or tiller for the purpose of land mine clearance.

Note 3: ML 6. does not control “vehicles” that meet all of the following descriptions:

- a. were manufactured before 1946;*
- b. do not have items specified in this Schedule and manufactured after 1945, except for reproductions of original components or accessories for the vehicle; and*
- c. do not incorporate weapons specified in ML1., ML2. or ML 4. unless they have been certified by a registered UK Proof House as having been rendered incapable of firing any ammunition in this Schedule.*

<p>ML7</p>	<p>Chemical or biological toxic agents, toxic chemicals and mixtures containing such agents or chemicals, “riot control agents”, radioactive materials, related equipment, components and materials as follows:</p> <p><i>Note: In some instances chemicals are listed by name and Chemical Abstract Service (CAS) number. Chemicals of the same structural formula (e.g. hydrates) are controlled regardless of name or CAS number. CAS numbers are shown to assist in identifying whether a particular chemical or mixture is controlled, irrespective of nomenclature. CAS numbers cannot be used as unique identifiers because some forms of the listed chemical have different CAS numbers, and mixtures containing a listed chemical may also have different CAS numbers.</i></p>
	<p>a. Biological agents or radioactive materials, “adapted for use in war” to produce casualties in humans or animals, degrade equipment or damage crops or the environment;</p>
	<p>b. Chemical warfare (CW) agents including, but not limited to, the following:</p>
	<p>1. CW nerve agents:</p> <p>a. O-Alkyl (equal to or less than C₁₀, including cycloalkyl) alkyl (Methyl, Ethyl, n-Propyl or Isopropyl)-phosphonofluoridates, such as:</p> <p>Sarin (GB):O-Isopropyl methylphosphonofluoridate (CAS 107-44-8); and</p> <p>Soman (GD):O-Pinacolyl methylphosphonofluoridate (CAS 96-64-0);</p> <p>b. O-Alkyl (equal to or less than C₁₀, including cycloalkyl) N,N-dialkyl (Methyl, Ethyl, n-Propyl or Isopropyl) phosphoramidocyanidates, such as:</p> <p>Tabun (GA):O-Ethyl N,Ndimethylphosphoramidocyanidate (CAS 77-81-6);</p> <p>c. O-Alkyl (H or equal to or less than C₁₀, including cycloalkyl) S-2-dialkyl (Methyl, Ethyl, n-Propyl or Isopropyl)-aminoethyl alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) phosphonothiolates and corresponding alkylated and protonated salts, such as:</p> <p>VX: O-Ethyl S-2-diisopropylaminoethyl methyl phosphonothiolate (CAS 50782-69-9);</p>

2. CW vesicant agents:

a. Sulphur mustards, such as:

1. 2-Chloroethylchloromethylsulphide (CAS 2625-76-5);
2. Bis(2-chloroethyl) sulphide (CAS 505-60-2);
3. Bis(2-chloroethylthio) methane (CAS 63869-13-6);
4. 1,2-bis (2-chloroethylthio) ethane (CAS 3563-36-8);
5. 1,3-bis (2-chloroethylthio)-n-propane (CAS 63905-10-2);
6. 1,4-bis (2-chloroethylthio)-n-butane (CAS 142868-93-7);
7. 1,5-bis (2-chloroethylthio)-n-pentane (CAS 142868-94-8);
8. Bis (2-chloroethylthiomethyl) ether (CAS 63918-90-1);
9. Bis (2-chloroethylthioethyl) ether (CAS 63918-89-8);

b. Lewisites, such as:

1. 2-chlorovinylchloroarsine (CAS 541-25-3);
2. Tris (2-chlorovinyl) arsine (CAS 40334-70-1);
3. Bis (2-chlorovinyl) chloroarsine (CAS 40334-69-8);

c. Nitrogen mustards, such as:

1. HN1: bis (2-chloroethyl) ethylamine (CAS 538-07-8);
2. HN2: bis (2-chloroethyl) methylamine (CAS 51-75-2);
3. HN3: tris (2-chloroethyl) amine (CAS 555-77-1);

3. CW Incapacitating agents, such as:

- a. 3-Quinuclidinyl benzilate (BZ) (CAS 6581-06-2);

4. CW defoliants, such as:

- a. Butyl 2-chloro-4-fluorophenoxyacetate (LNF);

	<p>b. 2,4,5-trichlorophenoxyacetic acid (CAS 93-76-5) mixed with 2,4-dichlorophenoxyacetic acid (CAS 94-75-7) (Agent Orange (CAS 39277-47-9));</p>
	<p>c. CW binary precursors and key precursors, as follows, and chemical mixtures containing one or more of these precursors:</p> <ol style="list-style-type: none"> 1. Alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) Phosphonyl Difluorides, such as: DF: Methyl Phosphonyldifluoroide (CAS 676-99-3); 2. O-Alkyl (H equal to or less than C₁₀, including cycloalkyl) O-2-dialkyl (Methyl, Ethyl, n-Propyl or Isopropyl)-aminoethyl alkyl (Methyl, Ethyl, n-Propyl or Isopropyl) phosphonites and corresponding alkylated and protonated salts, such as: QL: O-Ethyl O-2-di-isopropylaminoethyl methylphosphonite (CAS 57856-11-8); 3. Chlorosarin: Q-Isopropyl methylphosphonochloridate (CAS 1445-76-7); 4. Chlorosoman O-Pinacolyl methylphosphonochloridate (CAS 7040-57-5);
	<p>d. "Riot control agents", active constituent chemicals and combinations thereof including:</p> <ol style="list-style-type: none"> 1. α-Bromobenzeneacetonitrile, (Bromobenzyl cyanide) (CA) (CAS 5798-79-8); 2. [2-chlorophenyl] methylene] propanedinitrile, (o-Chlorobenzylidenemalononitrile) (CS) (CAS 2698-41-1); 3. 2-Chloro-1-phenylethanone, Phenylacetyl chloride (ω-chloroacetophenone) (CN) CAS 532-27-4); 4. Dibenz-(b,f)-1,4-oxazephine (CR) (CAS 257-07-8); 5. 10-Chloro-5,10-dihydrophenarsazine, (Phenarsazine chloride), (Adamsite), (DM) (CAS 578-94-9);

	<p>6. N-Nonanoylmorpholine, (MPA) (CAS 5299-64-9);</p> <p><i>Note 1: ML7.d. does not control “riot control agents” individually packaged for personal self-defence purposes.</i></p> <p><i>Note 2: ML7.d. does not control active constituent chemicals and combinations thereof identified and packaged for food production or medical purposes.</i></p>
	<p>e. Equipment specially designed or modified for military use, designed or modified for the dissemination of any of the following, and specially designed components therefor:</p> <ol style="list-style-type: none"> 1. Materials or agents specified in ML7.a., ML7.b. or ML7.d.; 2. CW agents made up of precursors specified in ML7.c.;
	<p>f. Protective and decontamination goods, specially designed or modified for military use, components and chemical mixtures as follows:</p> <ol style="list-style-type: none"> 1. Goods designed or modified for defence against materials specified in ML7.a., ML7.b. or ML7.d. and specially designed components therefor; <p><i>N.B.: See also 1A of Annex 1 to “the dual-use Regulation”.</i></p> <ol style="list-style-type: none"> 2. Goods designed or modified for decontamination of goods contaminated with materials specified in ML7.a. or ML7.b. and specially designed components therefor; 3. Chemical mixtures specially developed or formulated for the decontamination of goods contaminated with materials specified in ML7.a. or ML7.b.;
	<p>g. Goods specially designed or modified for military use, designed or modified for the detection or identification of materials specified in ML7.a., ML7.b. or ML7.d. and specially designed components therefor;</p> <p><i>N.B. See also 1A in Annex I to “the dual-use Regulation”.</i></p> <p><i>Note: ML7.g. does not control personal radiation monitoring dosimeters.</i></p>

	<p>h. “Biopolymers” specially designed or processed for the detection or identification of CW agents specified in ML7.b., and the cultures of specific cells used to produce them;</p>
	<p>i. “Biocatalysts” for the decontamination or degradation of CW agents, and biological systems therefor, as follows:</p> <ol style="list-style-type: none"> 1. “Biocatalysts” specially designed for the decontamination or degradation of CW agents specified in ML7.b., and resulting from directed laboratory selection or genetic manipulation of biological systems; 2. Biological systems containing the genetic information specific to the “production” of “biocatalysts” specified in ML7.i.l. as follows: <ol style="list-style-type: none"> a. “Expression vectors”; b. Viruses; c. Cultures of cells.
	<p><i>Note 1: ML7.b. and ML7.d. do not control:</i></p> <ol style="list-style-type: none"> a. <i>Cyanogen chloride (CAS 506-77-4);</i> <p><i>N.B.: See 1C of Annex I to “the dual-use Regulation”.</i></p>
	<ol style="list-style-type: none"> b. <i>Hydrocyanic acid (CAS 74-90-8);</i> c. <i>Chlorine (CAS 7782-50-5);</i> d. <i>Carbonyl chloride (phosgene) (CAS 75-44-5);</i> <p><i>N.B.: See 1C of Annex I to “the dual-use Regulation”.</i></p> <ol style="list-style-type: none"> e. <i>Diphosgene (trichloromethyl-1-chloroformate) (CAS 503-38-8);</i> f. <i>This entry is not used;</i> g. <i>Xylyl bromide: ortho: (CAS 89-92-9), meta: (CAS 620-13-3), para: (CAS 104-81-4);</i>

	<p>h. Benzyl bromide (CAS 100-39-01);</p> <p>i. Benzyl iodide (CAS 620-05-3);</p> <p>j. Bromo acetone (CAS 598-31-2);</p> <p>k. Cyanogen bromide (CAS 506-68-3);</p> <p>l. 	<p>Note 2: The cultures of cells and biological systems specified in ML7.h. and ML7.i.2. are exclusive and ML7.h. and ML7.i.2 do not include cells or biological systems for civil purposes, (e.g. agricultural, pharmaceutical, medical, veterinary, environmental, waste management, or in the food industry).</p>

<p>ML8</p>	<p>“Energetic materials”, and related substances, as follows</p> <p><i>N.B. Charges and devices are controlled in ML4 and 1.A.8 of Annex I to “the dual-use Regulation”.</i></p> <p><i>Note: In some instances chemicals are listed by name and Chemical Abstract Service (CAS) number. Chemicals of the same structural formula (e.g. hydrates) are controlled regardless of name or CAS number. CAS numbers are shown to assist in identifying whether a particular chemical or ‘mixture’ is controlled, irrespective of nomenclature. CAS numbers cannot be used as unique identifiers because some forms of the listed chemical have different CAS numbers, and ‘mixtures’ containing a listed chemical may also have different CAS numbers.</i></p> <p><i>Technical Note:</i></p> <ol style="list-style-type: none"> 1. <i>A ‘mixture’ refers to a composition of two or more substances with at least one substance being controlled in ML8.</i> 2. <i>Particle size is the mean particle diameter on a weight or volume basis. International or equivalent national standards will be used in sampling and determining particle size.</i>
	<p>a. “Explosives”, as follows, and ‘mixtures’ thereof:</p> <ol style="list-style-type: none"> 1. ADNBF (aminodinitrobenzofuroxan or 7-amino-4,6-dinitrobenzofurazane-1-oxide) (CAS 97096-78-1); 2. BNCP (cis-bis (5-nitrotetrazolato) tetra amine-cobalt (III) perchlorate) (CAS 117412-28-9); 3. CL-14 (diamino dinitrobenzofuroxan or 5,7-diamino-4,6-dinitrobenzofurazane-1-oxide) (CAS 117907-74-1); 4. CL-20 (HNIW or Hexanitrohexaazaisowurtzitane) (CAS 135285-90-4); chlathrates of CL-20; 5. CP (2-(5-cyanotetrazolato)penta amine-cobalt (III) perchlorate) (CAS 70247-32-4); 6. DADE (1,1-diamino-2,2-dinitroethylene, FOX7); (CAS 145250-81-3); 7. DATB (diaminotrinitrobenzene) (CAS 1630-08-6); 8. DDFP (1,4-dinitrodifurazanopiperazine); 9. DDPO (2,6-diamino-3,5-dinitropyrazine-1-oxide, PZO) (CAS 194486-77-6);

10. DIPAM (3,3'-diamino-2,2',4,4',6,6'-hexanitrobiphenyl or dipicramide) (CAS 17215-44-0);
11. DNGU (DINGU or dinitroglycoluril) (CAS 55510-04-8);
12. Furazans as follows:
 - a. DAAOF (DAAF, DDAFox, or diaminoazoxyfuran);
 - b. DAAzF (diaminoazofuran) (CAS 78644-90-3);
13. HMX and derivatives as follows:
 - a. HMX (Cylotetramethylenetetranitramine, octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazine, 1,3,5,7-tetranitro-1,3,5,7-tetraazacyclooctane, octogen or octogene) (CAS 2691-41-0);
 - b. Difluoroaminated analogs of HMX;
 - c. K-55 (2,4,6,8-tetranitro-2,4,6,8-tetraazabicyclo-[3,3,0]-octanone-3, tetranitrosemiglycouril or ketobicyclic HMX) (CAS 130256-72-3);
14. HNAD (hexanitroadamantane) (CAS 143850-71-9);
15. HNS (hexanitrostilbene) (CAS 2006-22-0);
16. Imidazoles as follows:
 - a. BNNII (Octahydro-2,5-bis(nitroimino)imidazo [4,5-d]imidazole);
 - b. DNI (2,4-dinitroimidazole) (CAS 5213-49-0);
 - c. FDIA (1-fluoro-2,4-dinitroimidazole);
 - d. NTDNIA (N-(2-nitrotriazolo)-2,4-dinitroimidazole);
 - e. PTIA (1-picryl-2,4,5-trinitroimidazole);
17. NTNMH (1-(2-nitrotriazolo)-2-dinitromethylene hydrazine);
18. NTO (ONTA or 3-nitro-1,2,4-triazol-5-one) (CAS 932-64-9);
19. Polynitrocubanes with more than four nitro groups;
20. PYX (2,6-bis(picrylamino)-3,5-dinitropyridine) (CAS 38082-89-2);

19. Superfine iron oxide (Fe₂O₃) with a specific surface area more than 250 m²/g and an average particle size of 3.0 nm or less;
20. TEPAN (tetraethylenepentaamineacrylonitrile) (CAS 68412-45-3); cyanoethylated polyamines and their salts;
21. TEPANOL (tetraethylenepentaamineacrylonitrileglycidol) (CAS 68412-46-4); cyanoethylated polyamines adducted with glycidol and their salts;
22. TPB (triphenyl bismuth) (CAS 603-33-8);
23. TEPB (Tris (ethoxyphenyl) bismuth) (CAS 90591-48-3);

g. Precursors as follows:

1. BCMO (bischloromethyloxetane) (CAS 142173-26-0);
2. Dinitroazetidine-t-butyl salt (CAS 125735-38-8);
3. Hexaazaisowurtzitane derivatives including HBIW (hexabenzylhexaazaisowurtzitane) (CAS 124782-15-6) (see also ML8.a.4.) and TAIW (tetraacetyldibenzylhexaazaisowurtzitane) (CAS 182763-60-6) (see also ML8.a.4.);
4. This entry is not used;
5. TAT (1,3,5,7-tetraacetyl-1,3,5,7-tetraaza cyclo-octane) (CAS 41378-98-7);

	<ol style="list-style-type: none"> 6. 1,4,5,8-tetraazadecalin (CAS 5409-42-7); 7. 1,3,5-trichlorobenzene (CAS 108-70-3); 8. 1,2,4-trihydroxybutane (1,2,4-butanetriol) (CAS 3068-00-6); 9. DADN (1,5-diacetyl-3,7-dinitro-1,3,5,7-tetraazacyclooctane) (see also ML8.a.13.).
ML9	<p>“Vessels” of war, special naval equipment, accessories, components and other surface “vessels” as follows:</p> <p><i>N.B.: Electronic guidance and navigation equipment is controlled in ML11.a.</i></p> <ol style="list-style-type: none"> a. “Vessels” and components as follows: <ol style="list-style-type: none"> 1. “Vessels” (surface or underwater) specially designed or modified for military use, regardless of current state of repair or operating conditions, and whether or not they contain weapon delivery systems or armour, and components therefor specially designed or modified for military use; 2. Surface “vessels” other than those specified in ML9.a.1. having any of the following fixed or integrated into the “vessel”: <ol style="list-style-type: none"> a. Automatic weapons having a calibre of 12.7 mm or greater specified in ML1, or weapons specified in ML2., ML4., ML12. or ML19, or ‘mountings’ or hard points for such weapons; <p><i>Technical Note:</i></p> <p><i>‘Mountings’ refers to weapon mounts or structural strengthening for the purpose of installing weapons.</i></p> <ol style="list-style-type: none"> b. Fire control systems specified in ML5; c. Both: <ol style="list-style-type: none"> 1. ‘CBRN protection’; and 2. ‘Pre-wet or wash down system’ designed for decontamination purposes; or

	<p style="text-align: center;"><i>Technical Note:</i></p> <ol style="list-style-type: none"> 1. <i>CBRN protection' is self-contained interior space containing features such as over-pressurization, isolation of ventilation systems, limited ventilation openings with chemical, biological, radiological and nuclear filters and limited personnel access points incorporating air-locks.</i> 2. <i>Pre-wet or wash down system' is a seawater spray system capable of simultaneously wetting the exterior superstructure and decks of a vessel.</i> <p>d. Active weapon countermeasure systems specified in ML4.b., or ML5 c. or ML11.a. but only where the “vessel” has any of the following:</p> <ol style="list-style-type: none"> 1. ‘CBRN protection’; 2. Hull and superstructure, specially designed to reduce the radar cross section; 3. Thermal signature reduction devices, (e.g. an exhaust gas cooling system), excluding those specially designed to increase overall power plant efficiency or to reduce the environmental impact; or 4. A degaussing system designed to reduce the magnetic signature of the whole vessel. <p>b. Anti-submarine nets and anti-torpedo nets, specially designed for military use;</p> <p>c. Hull penetrators and connectors specially designed for military use, that enable interaction with equipment external to a “vessel”, and components therefor specially designed for military use.</p>
ML10	<p>“Aircraft”, “lighter-than-air vehicles”, “Unmanned Aerial Vehicles” (“UAVs”), aero-engines and “aircraft” equipment, related goods and components, as follows, specially designed or modified for military use.</p> <p><i>N.B.: Electronic guidance and navigation equipment is controlled in ML11.a.</i></p> <p>a. Manned “aircraft” and “lighter-than-air vehicles”, and specially designed components therefor;</p> <p>b. This entry is not used.</p>

	<p>c. Unmanned aircraft and related equipment, as follows, and specially designed components therefor:</p> <ol style="list-style-type: none"> 1. “UAVs” Remotely Piloted Air Vehicles (RPVs), autonomous programmable vehicles and unmanned “lighter-than-air vehicles”; 2. Launchers, recovery equipment and ground support equipment; 3. Equipment designed for command or control;
	<p>d. Propulsion aero-engines and specially designed components therefor;</p>
	<p>e. Airborne refuelling equipment specially designed or modified for any of the following, and specially designed components therefor:</p> <ol style="list-style-type: none"> 1. “Aircraft” specified by ML10.a.; or 2. Unmanned aircraft specified by ML10.c.;
	<p>f. ‘Ground equipment’ specially designed for aircraft specified by ML10.a. or aero-engines specified by ML10.d.;</p> <p><i>Technical Notes:</i></p> <ol style="list-style-type: none"> 1. ‘Ground equipment’ includes pressure refuelling equipment and equipment designed to facilitate operations in confined areas. 2. ‘Ground equipment’ means ground-based equipment for the operation, handling, maintenance, checking, repair, overhaul and refurbishment of “aircraft” or aero-engines.
	<p>g. Aircrew life support equipment, aircrew safety equipment and other devices for emergency escape, not specified in ML10.a., designed for “aircraft” specified by ML10.a.;</p> <p><i>Note: ML10.g. does not control aircrew helmets that do not incorporate, or have mountings or fittings for, equipment specified in this Schedule.</i></p> <p><i>N.B.: For helmets see also ML13.c.</i></p>
	<p>h. Parachutes, paragliders and related equipment, as follows, and specially designed components therefor:</p> <ol style="list-style-type: none"> 1. Parachutes not specified elsewhere in this Schedule; 2. Paragliders;

	<p>3. Equipment specially designed for high altitude parachutists;</p>
	<p>i. Controlled opening equipment or automatic piloting systems designed for parachuted loads.</p>
	<p><i>Note: ML 10. does not control “aircraft” meeting all of the following descriptions:</i></p> <p>a. <i>were first manufactured before 1946;</i></p> <p>b. <i>do not incorporate items specified in this Schedule unless the items are required to meet safety or airworthiness standards; and</i></p> <p>c. <i>do not incorporate weapons specified in this Schedule, unless they have been certified by a registered UK Proof House as having been rendered incapable of firing any ammunition listed in this Schedule.</i></p>
ML11	<p>Electronic equipment, “spacecraft” and components, not specified elsewhere in this Schedule, as follows:</p>
	<p>a. Electronic equipment specially designed or modified for military use and specially designed components therefor;</p>
	<p>b. Global Navigation Satellite Systems (GNSS) jamming equipment and specially designed components therefor;</p> <p><i>Note: ML11.a. controls all electronic guidance and navigation equipment.</i></p>
	<p>c. “spacecraft” specially designed or modified for military use, and “spacecraft” components specially designed for military use.</p>
ML12	<p>High velocity kinetic energy weapon (KEW) systems and related equipment, as follows, and specially designed components therefor:</p>
	<p>a. Kinetic energy weapon systems specially designed for destruction or effecting mission abort of a target;</p> <p><i>N.B.: For weapon systems using sub-calibre ammunition or employing solely chemical propulsion, and ammunition therefor, see ML1 to ML4.</i></p>
	<p>b. Specially designed test and evaluation facilities and test models (e.g. diagnostic instrumentation and targets), for dynamic testing of kinetic energy projectiles and systems.</p>

ML13	Armoured or protective goods and constructions, as follows:
	<p>a. Armoured plate, having any of the following characteristics:</p> <ol style="list-style-type: none"> 1. manufactured to comply with a military standard or specification; or 2. suitable for military use; <p><i>N.B. For body armour plate, see ML 13.d.2.</i></p>
	<p>b. Constructions of metallic or non-metallic materials or combinations thereof specially designed to provide ballistic protection for military systems;</p>
	<p>c. Helmets manufactured according to military standards or specifications, or comparable national standards, and specially designed components therefor;</p> <p><i>Note: ML13.c. does not control:</i></p> <ol style="list-style-type: none"> a. <i>Conventional steel helmets, neither modified nor designed to accept, nor equipped with, any type of accessory device;</i> b. <i>Helmets manufactured before 1945;</i> c. <i>Individual helmets not specially designed for military use when accompanying their users.</i> <p><i>N.B.: Military high altitude parachutists' protective headgear is controlled in ML10.h.3.</i></p>
<p>d. Body armour or protective garments, and components therefor, as follows:</p> <ol style="list-style-type: none"> 1. Soft body armour or protective garments, manufactured to military standards or specifications, or to their equivalents, and specially designed components therefor; <p><i>Note: For the purposes of ML 13.d.1. military standards or specifications include, at a minimum, specifications for fragmentation protection.</i></p> <ol style="list-style-type: none"> 2. Hard body armour plates providing ballistic protection equal to or greater than level III (NIJ 0101.06 July 2008) or national equivalents 	

	<p><i>Note: ML13.d. does not control individual suits of body armour or ballistic protective garments for personal protection and accessories therefor when accompanying their users.</i></p> <p><i>N.B. See also 1A of Annex I to “the dual-use Regulation”.</i></p>
ML14	Specialised equipment for military training or for simulating military scenarios, simulators specially designed for training in the use of any firearm or weapon specified in ML1 or ML2, and specially designed components and accessories therefor.
ML15	Imaging or countermeasure equipment, as follows, specially designed for military use, and specially designed components and accessories therefor:
	a. Recorders and image processing equipment;
	b. Cameras, photographic equipment and film processing equipment;
	c. Image intensifier equipment;
	d. Infrared or thermal imaging equipment;
	e. Imaging radar sensor equipment;
	f. Countermeasure or counter-countermeasure equipment for the equipment specified in ML15.a. to ML15.e.
	<p><i>Note: ML15 does not control “first generation image intensifier tubes” or equipment specially designed so that only “first generation image intensifier tubes” are or can be incorporated in it.</i></p> <p><i>N.B. 1: For weapons sights incorporating “first generation image intensifier tubes” see ML1., ML2. and ML5.</i></p> <p><i>N.B. 2: See also 6A of Annex I to “the dual-use Regulation”.</i></p>
ML16	Forgings, castings and other unfinished goods, specially designed for any of the goods specified in ML1 to ML4, ML6, ML9, ML10, ML12 or ML19.
ML17	Miscellaneous goods, material and ‘libraries’, as follows, and specially designed components therefor:
	a. Self-contained diving and underwater swimming apparatus as follows:
	1. Closed or semi-closed circuit (rebreathing) apparatus specially designed for military use (i.e, specially designed to be non-magnetic);

	<p>2. Specially designed components for use in the conversion of open-circuit apparatus to military use;</p> <p>3. Goods designed exclusively for military use with self-contained diving and underwater swimming apparatus;</p> <p><i>N.B.: See also 8A002.q. of Annex I to “the dual-use Regulation”.</i></p>
	<p>b. Construction equipment specially designed for military use;</p>
	<p>c. Fittings, coatings and treatments for signature suppression, specially designed for military use;</p>
	<p>d. Field engineer equipment specially designed for use in a combat zone;</p>
	<p>e. “Robots”, “robot” controllers and “robot” “end-effectors”, meeting any of the following descriptions:</p> <p>1. specially designed for military use;</p> <p>2. incorporating means of protecting hydraulic lines against externally induced punctures caused by ballistic fragments (e.g. incorporating self-sealing lines) and designed to use hydraulic fluids with flash points higher than 839 K (566°C); or</p> <p>3. specially designed or rated for operating in an electromagnetic pulse (EMP) environment;</p> <p><i>Technical Note: Electro-magnetic pulse does not refer to unintentional interference caused by electromagnetic radiation from nearby equipment (e.g. machinery, appliances or electronics) or lightning.</i></p>
	<p>f. ‘Libraries’ (parametric technical databases) specially designed for military use with equipment specified in this Schedule;</p> <p><i>Technical Note: For the purpose of ML17, the term ‘libraries’ (parametric technical databases) means a collection of technical information of a military nature, reference to which may enhance the performance of military equipment or systems.</i></p>
	<p>g. Nuclear power generating equipment or propulsion equipment (e.g. “nuclear reactors”), specially designed for military use and components therefor, specially designed or modified for military use;</p>

	<p>h. Goods and material, coated, treated or prepared to provide signature suppression, specially designed for military use, other than those controlled elsewhere in this Schedule;</p>
	<p>i. Simulators specially designed for military “nuclear reactors”;</p>
	<p>j. Mobile repair shops specially designed or modified to service military equipment;</p>
	<p>k. Field generators specially designed or modified for military use;</p>
	<p>l. Containers specially designed or modified for military use;</p>
	<p>m. Ferries, other than those controlled elsewhere in this Schedule, rafts, bridges and pontoons, specially designed for military use;</p>
	<p>n. Test models specially designed for the “development” of goods controlled in ML4, ML6, ML9 or ML10;</p>
	<p>o. Laser protection equipment (e.g., eye and sensor protection) specially designed for military use;</p>
	<p>p. “Fuel cells”, other than those specified elsewhere in this Schedule, specially designed or modified for military use.</p>
ML18	<p>Production equipment and components, as follows:</p>
	<p>a. Specially designed or modified production equipment for the “production” of goods specified in this Schedule, and specially designed components therefor;</p>
	<p>b. Specially designed environmental test facilities and specially designed equipment therefor, for the certification, qualification or testing of goods specified in this Schedule.</p>
PL5017	<p>Equipment and test models other than those specified in ML11, ML12.b., ML17.n. or ML19.e. specially designed or modified for the “development” or “use” of military goods specified in this Schedule.</p>
ML19	<p>Directed energy weapon (DEW) systems, related or countermeasure equipment and test models, as follows, and specially designed components therefor:</p>
	<p>a. “Laser” systems specially designed for destruction or effecting mission-abort of a target;</p>

	b. Particle beam systems capable of destruction or effecting mission-abort of a target;
	c. High power radio-frequency (RF) systems capable of destruction or effecting mission-abort of a target;
	d. Equipment specially designed for the detection or identification of, or defence against, systems specified in ML19.a. to ML19.c.;
	e. Physical test models for the systems, equipment and components specified in ML19;
	f. "Laser" systems specially designed to cause permanent blindness to unenhanced vision (i.e. to the naked eye or to the eye with corrective eyesight devices).
ML20	Cryogenic and "superconductive" equipment, as follows, and specially designed components and accessories therefor:
	a. Equipment specially designed or configured to be installed in a vehicle for military ground, marine, airborne or space applications, capable of operating while in motion and of producing or maintaining temperatures below 103 K (-170°C);
	b. "Superconductive" electrical equipment (rotating machinery and transformers) specially designed or configured to be installed in a vehicle for military ground, marine, airborne or space applications and capable of operating while in motion.
	<i>Note: ML20 does not control direct-current hybrid homopolar generators that have single-pole normal metal armatures which rotate in a magnetic field produced by superconducting windings, provided those windings are the only superconducting component in the generator.</i>
ML21	"Software" as follows:
	a. "Software" specially designed or modified for the "development", "production" or "use" of equipment, materials or "software" specified in this Schedule;
	b. Specific "software", other than that specified in ML21.a., as follows:
	1. "Software" that is both specially designed for military use and specially designed for modelling, simulating or evaluating military weapons systems;

	<p>2. “Software” that is both specially designed for military use and specially designed for modelling or simulating military operational scenarios;</p> <p>3. “Software” for determining the effects of conventional, nuclear, chemical or biological weapons;</p> <p>4. “Software” that is both specially designed for military use and specially designed for Command, Communications, Control and Intelligence (C3I) applications or Command, Communications, Control, Computer and Intelligence (C4I) applications;</p> <p>c. “Software”, not specified in ML21.a. or b., specially designed or modified to enable equipment not specified in this Schedule to perform the military functions of equipment specified in this Schedule;</p> <p>d. Other “software” specially designed or modified for military use.</p> <p><i>N.B. Source code for “software” is controlled in ML22.</i></p>
PL5001	<p>Other security and para-military police goods as follows:</p> <p>a. Acoustic devices represented by the manufacturers or suppliers thereof as suitable for riot control purposes, and specially designed components therefor;</p> <p>b. Anti-riot and ballistic shields and specially designed components therefor;</p> <p>c. Shackles designed for restraining human beings having an overall dimension including chain, when measured from the outer edge of one cuff to the outer edge of the other cuff, of between 240mm and 280mm when locked;</p> <p><i>N.B.: See also 1.1 of Annex III to “the torture Regulation”.</i></p> <p>d. Water cannon and specially designed components therefor;</p> <p><i>N.B: See also 3.6 of Annex III to “the torture Regulation”.</i></p> <p>e. Riot control vehicles which have been specially designed or modified to be electrified to repel boarders and components therefor specially designed or modified for that purpose;</p>

	<p>f. Components specially designed or modified for portable devices designed or modified for the purposes of riot control or self-protection by the administration of an electric shock (e.g. electric-shock batons, electric-shock shields, stun-guns and electric-shock dart-guns).</p> <p><i>N.B. See also article 9 of this Order.</i></p>
<p>ML22</p>	<p>“Technology” as follows:</p>
	<p>a. “Technology”, other than “technology” specified in ML22.b., which is “required” for the “development”, “production”, operation, installation, maintenance (checking), repair, overhaul or refurbishing of goods or “software” specified in this Schedule;</p>
	<p>b. “Technology” as follows:</p> <ol style="list-style-type: none"> 1. “Technology” “required” for the design of, the assembly of components into, and the operation, maintenance and repair of complete production installations for goods specified in this Schedule, even if the components of such production installations are not specified; 2. This entry is not used; 3. This entry is not used; 4. “Technology” “required” exclusively for the incorporation of “biocatalysts”, specified in ML7.i.1, into military carrier substances or military material. <p><i>N.B. See article 18 and article 26 of this Order for exceptions from the controls on “technology”.</i></p>

EXPLANATORY NOTE

(This note is not part of the Order)

This Order implements Directive 2014/108/EU amending Directive 2009/43/EC of the European Parliament and of the Council as regards the list of defence related products (OJ L 359, 16.12.14, p.117) (the “amending Directive”). Directive 2009/43/EC (OJ L 146, 10.6.09, p.1) simplifies the terms and conditions of transfers within the Union of defence related products listed in the Annex which corresponds to the list in the Common Military List of the Union (the “CML”). The CML was updated in 2014 and the amending Directive makes the necessary changes to the Annex to Directive 2009/43/EC to incorporate these changes.

The Order replaces Schedule 2 to the Export Control Order 2008 which lists military goods, software and technology which are subject to export controls (“the UK list”). The content of the UK list derives partly from an international export control regime known as the Wassenaar Arrangement adopted in the EU through the CML, as well as from domestic UK controls. The substituted text of the Schedule reflects the changes. The Order also amends a UK national control (PL5001) in Schedule 2 to the Export Control Order 2008 in order to ensure consistency with changes introduced by Commission Implementing Regulation (EU) No 775/2014 (OJ L 210, 17.7.2014, p.1).

An Impact Assessment has not been prepared in respect of this Order as minimal or no impact on the private or voluntary sectors is foreseen. An Explanatory Memorandum and a transposition note are available alongside the instrument on the www.legislation.gov.uk website. Copies have also been placed in the Libraries of both Houses of Parliament.
